

VIRTUAL TRAINING

ACE Interface

Adverse Childhood Experiences (ACEs) are traumatic or stressful events that can occur in a child's life. ACE Interface is designed to support widespread awareness, promote understanding, and empower communities to improve health and well-being throughout society. Positive Childhood Experiences (PCEs) will also be addressed through the lens of the Healthy Outcomes from Positive Experiences (HOPE) model.

DATE & TIME

Wednesday January 29, 2025 10AM–12PM ET

LOCATION

Zoom

REGISTER

OBJECTIVES

- Learn how ACEs impact one's health through the exploration of human and brain development.
- Explore ACEs through the lens of a child and youth advocate.
- Receive an overview of the ACE study.
- Apply PCEs through the 4 Building Blocks of HOPE.
